

NATIONAL PARKINSON FOUNDATION

Research, Care, and Hope, Worldwide

Annual Report 2004

FIGHT BACK, MOVE FORWARD.

The National Parkinson Foundation believes that in our battle with Parkinson disease, knowledge is power and hope is everything. Every day at NPF we strive to provide patients and caregivers with the resources that help you fight back. We will support the research that moves us all forward. The cause and cure of Parkinson disease will be found.

Chairman Emeritus' Message

Nathan Slewett

If one of the marks of a good organization is its ability to attract new and enthusiastic leadership of the highest caliber, then the National Parkinson Foundation has much to celebrate in 2004. I am delighted that, after a quarter of a century as Chairman of this Foundation, we now have a new Chairman, Paul F. Oreffice, to complement Daniel Arty, who was elected President last year. I hasten to add that my new title, that of Chairman Emeritus, in no way signifies any diminution in the work that I will continue to do for the Foundation. To the contrary, the addition of Paul Oreffice will only enhance what I and others are able to accomplish in the fulfillment of our common mission.

Paul Oreffice is a unique individual. After coming from Italy as a young boy, he worked and studied his way to the pinnacle of American business, having served as Chairman and Chief Executive Officer of the Dow Chemical Company, positions from which he is now retired. Consistent with the very high regard in which he is held by his peers, Paul continues to contribute by serving as Chairman of Fairfield Homes, as well as on the Board of Spirit Finance and on the International Advisory Board of Marsh and McLennan. He is a former Director of The Coca-Cola Company, CIGNA Insurance, The Morgan Stanley Group, and Nortel. For him to have accepted the Chairmanship of the National Parkinson Foundation is a tribute to NPF and an indication of just how good our organization has become. We are most fortunate to have Paul Oreffice as our new Chairman.

Throughout this Annual Report there is overwhelming evidence of NPF's continued success. From programming to operations to finance to the increased funding of research, patient care, and outreach, we are doing more, and we are doing it better. I am proud to be a part of this noble effort, and I look forward to another year of high accomplishments and more success.

Sincerely,

A handwritten signature in cursive script that reads "Nathan Slewett".

Nathan Slewett
Chairman Emeritus

Chairman's Message

Paul Oreffice

This is my first report as Chairman of the National Parkinson Foundation. I am honored to accept this position. Nat Slewett, who built NPF into what it is today, will continue to be as active as ever, with his usual energy and enthusiasm. Don't let the "Emeritus" in his title fool you!

I really look forward to working with Nat, President Dan Arty, our Board of Directors, and all the other wonderful volunteers around the country who help us with our mission.

A careful review of the contents of this Annual Report is most revealing. Clearly our field operations are on a high-growth curve, as is our use of state-of-the-art information technology. Yet I want to focus on our financial statements, recently audited by outside independent auditors who issued a "clean" opinion and praised our financial practices and reporting. We have demonstrated impressive financial strength over the last few years, even as other organizations -- nonprofit and for profit alike -- were not able to deal with economic changes as successfully as we have. We have insisted on a high level of reporting and accountability with respect to our grants, as well as with respect to our internal operations. We have implemented the practice of having a formal, written evaluation for every conference or similar event that we organize. And we have maintained constant supervision over the work done by our staff, by our boards and committees, and by our volunteers. We have, in short, successfully run the Foundation using the business model that is an indispensable feature of any enterprise in today's world.

I am proud to serve as NPF's Chairman. Together with my wife, Jo Ann Pepper Oreffice, I am committed to finding the cause and cure for Parkinson disease and to helping those who must deal with that disease every day of their lives.

Sincerely,

A handwritten signature in black ink, appearing to read "Paul Oreffice". The signature is stylized and cursive.

Paul Oreffice
Chairman

Daniel Arty

President's Message

Without any doubt, the past year has been one of enormous accomplishments for the National Parkinson Foundation. The thumbnail summary of those accomplishments is impressive and speaks for itself:

- *We continued to expand our programming in all areas, including our field operations, our educational opportunities, and our publications.*
- *We launched a revamped website, created a new logo, and designed a new exhibit booth.*
- *We created a new Editorial Board and a new Centers Review Board, and we expanded our Board of Directors.*
- *And we are spending more money on our mission – research, care, and outreach – than ever before.*

When one adds the fact that we now have more Centers than ever before and a growing number of Chapters, it is evident that, having "raised the bar" to demand even more of ourselves, we have clearly met the higher standard.

I want to recognize those who have made possible these accomplishments: our loyal members who serve on our Board of Directors and Executive Committee, our generous donors whose contributions make possible everything that we do, the many volunteers who assist us in countless ways to accomplish our mission, and our dedicated staff who implement the policies and directives of our Board. My gratitude to all of them for all that they do every day on behalf of the Parkinson community.

As we begin a new year, I am determined that we continue to improve in everything we do, and I look forward to another year of great strides and achievements.

Sincerely,

A handwritten signature in black ink, appearing to read "Daniel Arty", written over a light-colored rectangular background.

Daniel Arty
President

Report of Activities and Achievements

On June 30, 2004, the National Parkinson Foundation closed its Fiscal Year 2003-04 with a third record-revenue year in a row.

Jose Garcia-Pedrosa

Over the last three years NPF has shown that it possesses, not just the will, but also the capability to fulfill its mission of finding the cause and cure for Parkinson disease and of helping those who must deal with it -- no matter how long that takes. Because we are committed to reaching our goal soon, we are devoting more and more of our resources to mission-related expenses, as follows:

◇ *Total expenses* are budgeted to increase in FY 2004-05 to \$13,089,793, compared to \$11,402,297 in FY 2003-04, representing *an increase of \$1,687,496, or 14.8%*.

◇ Expenditures on *Research* are budgeted to decrease in FY 2004-05 to \$3,559,139, compared to \$4,279,775 in FY 2003-04, excluding an approved but unallocated \$3 million for a new large-grants program, which amount was added to the research budget by the Executive Committee at the time of the adoption of the FY 2004-05 budget in an effort to use more of the increased revenues with which we have been blessed. The process of preparing the proposed new large-grants program and putting it in place makes it unlikely that any of these monies will be expended during the current fiscal year.

◇ Expenditures on *Patient Services* are budgeted to increase in FY 2004-05 to \$4,419,978, compared to \$2,773,938, representing *an increase of \$1,646,040, or 59.3 %*.

◇ Expenditures on *Public Education* are budgeted to increase in FY 2004-05 to \$2,611,943, compared to \$1,428,914, representing *an increase of \$1,183,029, or 82.8%*.

◇ *General and Administrative* expenditures are budgeted to decrease in FY 2004-05 to a 4-year low of \$838,433, compared to \$928,958 in FY 2003-04, representing a *decrease of \$90,525, or 9.7%*. This decrease reflects our continuing attempts to comply with your mandate that we spend more on the NPF mission and less on administration.

◇ Our *combined fundraising and general/administrative expenses* are budgeted to decrease in FY 2004-05 to *21.1%* of our *operating revenues*, compared to *23.2%* in FY 2003-04, with *general/administrative costs accounting for only 7.1%* of *operating revenues*.

These are impressive numbers, and the commitment that they embody is an ambitious

one, consistent with our Board's repeated directive that we diminish our accumulated earnings and use more and more of those earnings in the fulfillment of our mission. In evaluating our attainment of those objectives, it should be borne in mind that since its inception the *National Parkinson Foundation has spent more money on Research, on Patient Care, and on Outreach than any other single organization in the world -- with the sole exception of the Government of the United States*. This financial summary would be unacceptably incomplete without a grateful acknowledgement of the work done by **Mr. Martin Gelb** as chair of the Investment Committee, by **Mr. Marshall Burack** as chair of the Budget Committee, and by **Mr. Richard Alhadef** as chair of the Audit Committee.

One of the challenges that we faced in preparing the FY 2004-05 budget was the veto by Governor Bush of the \$1,046,000 State grant for the *NPF CareCenters (NPFCCs)*, a highly successful program that has brought outreach services to 10 locations throughout Florida. Ironically, this now-vetoed program grew from 5 Centers to 10 without a single additional dollar from the State! The State Legislature, for the 6th year in a row, funded us fully, but the Governor, perhaps acting on a totally flawed description of the program, decided to exercise his line-item veto power and left the program without any State funds. President Arty sent a comprehensive letter to the State, setting the record straight as to the nature and extent of the program and requesting that the letter be brought to the attention of the Governor, in the hope that the appropriation might be approved again next year and not vetoed. In the meantime, we are continuing the program at our own expense, albeit at a lower level, reflective of the notion that we have been providing excellent and necessary services to the public, which services ought to

be extended, even without the State grant, for as long as we can afford them.

Beyond purely financial matters, I am pleased to report on the following activities that have taken place since my last report to you:

In the area of Programming

Two factors account for the heightened levels of expenditure on activities relating to the fulfillment of our mission to find the cause and cure for Parkinson disease and to help those who must deal with the disease every day of their lives: an increase in the amount of money being spent on past and ongoing programs, and the creation and funding of exciting new activities that enhance our programming and, accordingly, our service to the Parkinson community. Examples of the latter are the highly successful ATTP and CPP programs, created and conducted by Field Services Director **Ruth Hagestuen**. ATTP is a training program for professionals and para-professionals in how to attend to the needs of Parkinson patients. Week-long sessions have been held so far this fiscal year in Miami, New York, Chicago, Springfield (MO), Los Angeles, and Houston. Sessions are already scheduled in Augusta, Georgia. Our new Washington, D.C. Chapter has requested the program, and it has been scheduled at that location in early 2005. The CPP Program links points of service in communities so as to help people with Parkinson disease to get information, support, and help.

In the area of Information Technology

◇ *Our newly redesigned website* was launched at 6 P.M., Eastern time, on July 9th, 2004. It was instantly met with many expressions of enthusiastic approval, as evidenced by the numerous telephone and electronic communications that we received in the ensuing days

and weeks. Here are some of the comments [emphasis in red added]:

- "The new website for parkinson.org is gorgeous! Congrats on a job well done."
- Kudos to the NEW NPF website! It looks great! Much easier to get around as well! Keep up the good work!
- I think I will like this new setup but I just got this and have to get used to this new setup. All I can say is lots of luck with your new setup. **In a few days I will send you a donation for Parkinsons because I always got lots of help previously.**
- "absolutely incredible"
- "The new site is truly great. Congratulations."
- "Excellent! Job well done "
- "I think it communicates very well. Thank you for all your great efforts in our behalf. **I hope to make substantial contributions in the future upon further recovery.**"
- "This new site is esthetically pleasing-- reflective of the superior quality professionals who have been selected by the NPF to represent the foundation, here and elsewhere."
- "I am delighted with your new website. Everything is so easy to access...and FAST! It makes our support group proud to be affiliated with NPF."

And, of course, there were (a few) negative comments, including these two:

- "YOU HAVE GOTTEN TOO FANCY. THE PREVIOUS SITE DISPLAY ETC WAS MUCH SIMPLER AND EASIER TO USE. REMEMBER, A LOT OF US ARE SICK. MAKE IT EASY FOR US WITHOUT ALL THE FANCY CLUTTER. HOPE FUNDS DONATED WERE NOT SPENT ON THE NEW DESIGN. BAH HUMBUG" [capital letters in the original]

- "I cannot read anything on the site. The print is much too tiny. The site must have been designed and then not read by the average person. I am very disappointed and frustrated." [N.B. The writer was called and told that she can click on an icon that makes all of the print larger. (The current print is no different in size from that of the previous website.)]

◇ *Our new logo*, approved by the NPF Editorial Board, accompanied the launch of the new website and has also been very well received. As an example, we received the following comment from one of our sibling organizations (which also recently changed its logo and its website), whose good wishes we deeply appreciate:

"The Parkinson's Disease Foundation congratulates you on this snappy and dignified new image! May it serve you, and the Parkinson's community, well and long."

◇ Also redesigned and highly acclaimed was the cover of the July issue of the *Parkinson Report*, for which we used the same artists who designed the new logo and the new homepage of the website.

With respect to our Chapters

◇ We now have **33 Chapters** that have signed Affiliation Agreements with NPF, and we have received several inquiries from prospective Chapters. This year's *Chapter Leadership Conference* took place at the end of October in New Orleans and overlapped the Centers of Excellence Coordinators Conference, at the request of both groups. One of the topics for discussion at the Chapter Leadership Conference was a draft of a proposed Charter for Chapters, which constitutes an attempt to do for Chapters what was done last year for Centers of Excellence: to define, in one docu-

ment, all of the relevant requirements, policies and procedures, mutual obligations, expectations, and other matters having to do with the relationship between NPF and each of its Chapters.

With respect to our Centers of Excellence

◇ As stated, this year's *Centers of Excellence Coordinators Conference* took place at the end of October in New Orleans, overlapping the Chapter Leadership Conference. In addition, this year we had in attendance, for the first time, many of the Medical Directors of the COEs, as well as representatives of the NPFCCs and NPFOCs (Outreach Centers) from around the country. Chairman Emeritus *Nathan Slewett* and President *Daniel Arty* addressed the attendees, and Chairman *Paul Oreffice*, who was traveling at the time of the conferences, presented a written acknowledgment.

◇ The inaugural meeting of the *Centers of Excellence Review Board* took place in Washington, D.C. last May, immediately following the annual meeting of the NPF *Scientific Advisory Board*. The COE Review Board received and reviewed applications for designation as a COE from 42 institutions. As a result, 30 institutions were recommended to and approved for such designation by the NPF Executive Committee, in addition to 12 International COEs, for a total of 42 Centers of Excellence. In addition, the actions of the COE Review Board led to the recommendation that grants to COEs be approved, and the Executive Committee did so in the total amount of \$2,687,367.

With respect to Other Events and Activities

◇ The NPF Editorial Board, also created this year and chaired by *Mr. Harold Kravitz*, met several times to carry out its responsibilities to oversee all of NPF's publications, print or electronic in nature. The Editorial Board has already made profound changes in the website and in the Parkinson Report and, as stated, approved the new NPF logo.

◇ The NPF Scientific Advisory Board met, as previously stated, in Washington, D.C., to review and consider approximately 140 applications for individual research grants. Its work resulted in the approval of 17 grants of \$40,000 each as part of a \$6.5 million overall grants program approved by the NPF Executive Committee.

◇ Last March in Fort Lauderdale the NPF Executive Committee Retreat took place over 1 1/2 days. The first day was devoted to presentations concerning all aspects of the work of the Foundation, and on the morning of the second day three group discussions took place as part of the policy-making function of the Executive Committee. The event was so successful that all 13 respondents to an Evaluation Form gave the program as a whole a rating of 5 (the highest possible), and all 12 respondents to the question about future Retreats opined that the Retreat should be repeated.

◇ Work is well under way on the 2005 International Gala for Hope, which will take place on February 12, 2005, at the J.W. Marriott Hotel on Brickell Avenue in Miami, and which will honor one of NPF's most loyal friends, Bernard J. Fogel, MD, Dean Emeritus of the University of Miami School of Medicine.

◇ With the valuable assistance of *Messrs. Edward Pazicky and Edward Kalikow*, the Foundation's insurance program is being revamped, including the appointment of a new insurance broker, Accordia, Ltd., a division of Wells Fargo International.

◇ Under the leadership of *Mr. Alan Slewett* as Chair of the Direct-Mail Committee, important revisions have been made to our direct-mail program in an effort to reduce costs and improve profitability.

◇ Our accounting staff, headed by Controller *Pam Olmo*, assisted our auditors in completing the audit of our Financial Statements at June 30, 2004. The auditors have issued an unqualified opinion letter and have met with the Audit Committee and with the Executive Committee -- in both instances expressing their approval of the procedures being followed at NPF, of our internal controls, and of the integrity of our financial reporting and documentation. Ms. Olmo must also be acknowledged for having performed admirably as the Project Manager for the Website Redesign project.

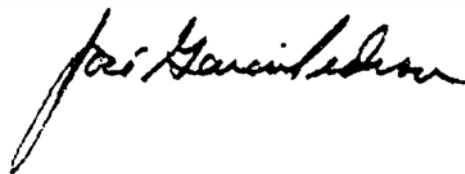

◇ As evidenced by our continuing financial success, our fundraising is strong and getting stronger, under the able and innovative leadership of *Mary Ann Sprinkle*. A mere glimpse at our website will demonstrate that our fundraising efforts have expanded dramatically this past year, both in terms of number of events and in terms of their geographic reach, their quality, and their ability to touch many more people's lives, to the benefit of the Foundation and of the Parkinson community.

◇ Our *General Staff*, it must be stated, has continued to perform in a manner of which you may justly be proud. It may be truly said that without them, the accomplishments sum-

marized herein could not have been achieved. They and the Senior Staff have taken Board directives and translated them into reality.

The closing words of this Report, fittingly, are devoted to a parting member of our staff, longtime Administrator *Julian Pearson*. No staff member has ever served the Foundation longer than Julian, who has announced his retirement effective on October 21st after more than 18 years of service. His departure leaves a huge void in our institutional memory and a lapse in our contacts with many other organizations and individuals. Beyond that, we are losing a loyal employee, a tireless worker, and -- more importantly than anything else -- a good friend. We wish him well.

Respectfully submitted,

Jose Garcia-Pedrosa
Chief Operating Officer

October, 2004

History of the National Parkinson Foundation

Never underestimate the power of an individual.
It takes only one person to change history.

For the National Parkinson Foundation, that individual was Jeanne C. Levey.

When Mrs. Jeanne C. Levey founded the National Parkinson Foundation, Inc. in Miami, Florida prior to 1957, her dream was to provide therapeutic services that would improve the quality of life of people with Parkinson disease and their families. In those days, physical therapy and loving care were the basic means of dealing with the disease. Actively involved with NPF for 22 years until her death at age 92, Mrs. Levey saw her dream become a reality ... but one

must wonder if she ever envisioned the kind of growth that took place following her death.

NPF began as an institution that provided only therapy for Parkinson patients, but in 1981, under an agreement with the University of Miami Medical School, the Foundation increased the size of its international headquarters in Miami from 12,500 sq. ft. to 50,000 sq. ft. and enlarged its scope of operations to house neurology physicians and neurosurgeons in various disciplines. In addition, the facilities were used to provide occupational, physical and speech therapies, and, most importantly, critically important research.

On the first floor of NPF world headquarters, a team of dedicated staff members manages the day-to-day operations of the Foundation and directs fundraising and educational initiatives. Physicians in the neurological and neurosurgical disciplines, on the teaching staff of the University of Miami School of Medicine are housed on the second floor. These physicians treat not only Parkinson disease, but allied neurological disorders as well. The third and fourth floors house respected researchers and scientists investigating Parkinson disease and other neurological and neu-

rodegenerative disorders. A one-of-a-kind Brain Endowment Bank, from which brain tissue is studied and disseminated to researchers all over the world, is also maintained at NPF's world headquarters.

NPF supports researchers; physicians; occupational, physical, and speech therapists; and psychological counselors. The Foundation also provides a vast array of educational programs and produces literature and medical information distributed free of charge to Parkinson patients, their families, neurologists, and general medical practitioners worldwide. Today, NPF is the oldest and largest national Parkinson foundation in the United States.

Today, NPF is the oldest and largest national Parkinson foundation in the United States.

The Mission of the National Parkinson Foundation

- *To find the cause of and the cure for Parkinson disease through research.*
- *To improve the quality of life for persons with Parkinson disease and their caregivers.*
- *To educate persons with Parkinson disease, their caregivers, healthcare professionals, and the general public about Parkinson disease and its treatment.*

Honorary Board of Governors

NPF has been fortunate to benefit from the longtime service and dedication of the late Chairman of the Honorary Board of Governors, Bob Hope. For more than 45 years, Bob and Dolores Hope were involved with NPF, giving graciously of their time, talents, and resources for the benefit of persons with Parkinson disease. Because of that generosity, the Bob Hope Parkinson's Research Institute was created, and the street on which NPF is headquartered is appropriately named "Bob Hope Road". Upon Bob Hope's passing, his daughter Linda Hope graciously agreed to serve as Vice Chair of the Honorary Board of Governors, and Mr. Dick Clark, a longtime and generous supporter of NPF, agreed to become Chair.

The NPF Honorary Board of Governors is composed of the following outstanding individuals, to each of whom the Foundation owes a debt of gratitude:

Dick Clark, Chair

Linda Hope, Vice Chair

Henny Backus

*Nathan Blaser**

Robert A.M. Coppentrath,
former Vice-Chairman of AGFA Corporation

Phyllis Diller

Eric Emanuel, Wall Street Financier

Betty Ford

President Gerald R. Ford

Kenneth O. Gilmore, former Editor-in-Chief,
Readers' Digest, Inc.

David B. Golub, Managing Director of Centre
Partners Management LLC

*Bob Hope**

David Laventhol, Editor-At-Large,
Times Mirror

Edwin A. Levy, Wall Street Financier

*Dr. Sidney L. Olson**

Paul F. Oreffice, former Chairman of
The Dow Chemical Company

U.S. Senator Claiborne Pell

Sylvia. A. Sack, Publisher

Professor Erich Segal, Author

Richard B. Stolley, Senior Editorial Adviser,
Time, Inc.

Nicholas L. Teti, President of Dupont
Pharmaceuticals Worldwide

Martin Tuchman, Chairman and CEO of
Interpool, Inc.

Norma G. Udall

U. S. Congressman Henry A. Waxman

*U.S. Senator Paul D. Wellstone**

**Deceased*

National Parkinson Foundation, Inc.

Officers and Directors

The National Parkinson Foundation is privileged to have an outstanding and dedicated group of volunteers who donate their time and talents by serving as Officers and on the NPF Board of Directors. Without their selfless efforts, the work of the Foundation would not be possible. We recognize and thank them for their generosity.

Research

Since its inception, the National Parkinson Foundation has supported more research in Parkinson disease than any other organization in the world, with the exception of the Government of the United States. NPF supports laboratory and clinical research in institutions throughout the world, designated as NPF Centers of Excellence. NPF also provides individual research grants under a program designed to provide funds to individual investigators to develop novel and promising ideas that might not otherwise be funded, but which show promise worth exploring. In addition, NPF is creating a special large-grants program called "Fight Back, Move Forward", funded solely by NPF with \$3 million dollars.

Brain Endowment Bank

For researchers fully to understand and begin to unravel the mysteries of Parkinson disease, they must be able to study and analyze the human brain. To meet this need, the National Parkinson Foundation, in collaboration with the University of Miami School of Medicine, created one of the first brain banks in the world.

The NPF/UM Brain Endowment Bank has coordinated an efficient nationwide network to accept brain endowments and has been very successful in educating the public about the importance of brain donation as a valuable research resource. The donor base includes both healthy and diseased brains, thereby enabling researchers to compare the difference between the two. Once collected, brain tissue is frozen for various research initiatives, including the effects of aging on the brain. Data on brains of various ages and stages of disease are compared to determine what causes the deterioration of cells.

In addition to supporting in-house research initiatives, brain tissue collected at the NPF/UM Brain Endowment Bank is shared with and distributed to researchers around the country. Since all brain and movement disorders have common traits, it is the Foundation's policy to be holistic in its approach to research activities. This results in expanded and extensive research, not only in Parkinson disease, but also in allied neurological disorders such as Alzheimer's, Huntington's disease, Multiple Sclerosis, epilepsy, stroke, and the like.

SCIENTIFIC ADVISORY BOARD

The NPF Scientific Advisory Board, made up of leading researchers and prominent physicians independent of the Foundation, keeps abreast of and on the forefront of new research initiatives and discoveries that are made by researchers throughout the world.

Members of NPF's Scientific Advisory Board meet on an annual basis to evaluate the research-grant applications that have been received, as well as the progress of work being done with current grants. This ensures that the efficiency of research dollars will be maximized. It is important to note that all grants given are utilized purely for research and cannot be used for overhead, travel, or other administrative expenses.

Following is a list of our prestigious Scientific Advisory Board Members:

Donald Calne, D.M., F.R.C.P.
Belzberg Family Professor of Medicine,
Head, Division of Neurology
University of British Columbia Health
Sciences Centre Hospital
Vancouver, British Columbia, Canada

David F. Clayton, Ph.D.
University of Illinois
Urbana, Illinois

Ariel Y. Deutch, Ph.D., Chair
Vanderbilt University School of Medicine,
Department of Psychiatry
Nashville, Tennessee

Robert H. Edwards, M.D.
Massachusetts Institute of Technology
Cambridge, Massachusetts

Julia George, Ph.D.
University of Illinois
Urbana, Illinois

Ann M. Graybiel, Ph.D.
Walter A. Rosenblith Professor
Massachusetts Institute of Technology
Cambridge, Massachusetts

Mark Guttman, M.D.
Adult Neurology and Movement Disorders
Markham-Stouffville Health Centre
Markham, Ontario, Canada

Mark Hallett, M.D.
Clinical Director, Section of Neurology
National Institute of Neurological Disorders
and Stroke (NINDS)
Bethesda, Maryland

Franz F. Hefti, Ph.D.
James E. Birren Professor of Gerontology
NPF Research Scholar, Merck, Sharpe and Dohme
San Diego, California

Irwin J. Kopin, M.D.
Former Director, Intramural Research Program
National Institute of Neurological Disorders
and Stroke (NINDS)
Bethesda, Maryland

George Paulson, M.D.
The Ohio State University Hospital
Columbus, Ohio

Ian J. Reynolds, Ph.D.
University of Pittsburgh
Pittsburgh, Pennsylvania

David R. Sibley, Ph.D.
National Institute of Neurological
Disorders and Stroke (NINDS)
Bethesda, Maryland

A. Jon Stoessl, D.M.
Professor of Medicine, Head, Division of Neurology
University of British Columbia, Health
Sciences Centre Hospital
Vancouver, British Columbia, Canada

Stella E. Tsirka, Ph.D.
University Medical Center at Stony Brook
Stony Brook, NY

Anne B. Young, M.D.
Julianne Dorn Professor, Harvard Medical School
Chief of Neurology Service, Massachusetts General Hospital
Boston, Massachusetts

NPF Editorial Board

In late 2003, the Board of Directors of the National Parkinson Foundation created an Editorial Board and approved a Charter for it.

No material may be published by the Foundation, whether in print or electronically, without the prior approval of the Editorial Board. All decisions of the Editorial Board may be reviewed by the NPF Executive Committee, which retains ultimate authority as the governing body of the Foundation.

The following persons have been appointed to serve on the NPF Editorial Board:

Harold P. Kravitz, Esq., Chair

E. Richard Alhadeff, Esq.

Ruth Hagestuen, R.N., M.A.

Gale Kittle, R.N., M.P.H.

Abraham N. Lieberman, M.D.

Richard B. Stolley

NPF Centers Review Board

The Board of Directors of the National Parkinson Foundation has approved a Charter for Centers of Excellence (COEs), NPF Care Centers, and NPF Outreach Centers. The Charter outlines the standards required of Centers, describes the relationship between the Centers and the Foundation, and sets forth the procedures applicable to applying for and obtaining both designation as a Center and grants to designated Centers. Appointments are made by the NPF Board of Directors for three-year periods, renewable as may be warranted.

The following persons have been appointed to serve on the NPF Centers Review Board:

Ruth Hagestuen, R.N., M.A., Chair

Donald Calne, D.M., F.R.C.P.

Elaine Cohen, Ph.D.

Gladys Gonzalez-Ramos, Ph.D.

Ann Graybiel, Ph.D.

Franz Hefti, Ph.D.

J. Thomas Hutton, M.D., Ph.D.

Susan Imke, R.N., M.S.

Irving J. Kopin, M.D.

George Paulson, M.D.

Ronald F. Pfeiffer, M.D.

Paul M. Silverstein, M.D.

National Parkinson Foundation Centers of Excellence

Centers of Excellence are a core component of the NPF research and care-delivery system. Conceptualized as the local-area or regional "hub" for Parkinson disease research, services, education, and outreach, Centers of Excellence are expected to assume a leadership position in the provision of innovative models of service and in the development of community relations to support health-promotion efforts in Parkinson disease. Wherever there are NPF Affiliate Chapters – the local-area "grassroots" organization in their communities – Centers of Excellence are expected to work collaboratively with them.

In short, the NPF Centers of Excellence are the place to which persons with Parkinson disease, caregivers and families, health-care providers, and others in the community turn for the most up-to-date research, specialized services, support, information, and referral services for Parkinson disease. NPF's Centers of Excellence define the "gold standard" in Parkinson-related research, care, and outreach.

National Parkinson Foundation Outreach Centers

Outreach is a process of sustained commitment to serve whole communities affected by Parkinson disease. The emphasis on outreach ensures that the needs of the traditionally underserved are responded to by existing services or by the development of alternate modes of service

delivery. The various methods used in outreach need to be meaningful, intentional, and respectful of the community's wisdom and values. NPF Outreach Centers assume a leadership role in developing and implementing outreach initiatives.

National Parkinson Foundation Chapters

NPF's Chapters are the grassroots organizations closest to those in need of assistance. Relying largely on a volunteer base to accomplish their mission, Chapters provide a unique value to the communities that they serve, according to their individual capacities. NPF seeks to assist Chapters in increasing their capacity to serve their communities. Chapters develop and implement varied programming, including community relations, resources clearinghouse, fundraising, awareness, education, advocacy, and support groups.

Education and Outreach

Consistent with its mission, NPF believes that education is of the utmost importance when it comes to the management of Parkinson disease.

Therefore, in addition to funding research all over the world to find the cause of and cure for Parkinson disease, and in addition to funding comprehensive-care delivery, NPF has developed a vast array of educational and outreach programs.

The Foundation publishes several educational booklets, including the quarterly *Parkinson Report*, which features information on current research initiatives, new medications and surgical procedures, and Foundation events. Following is a list of publications:

- 1) ***NPF Brochure***: Your Guide to Parkinson Disease
- 2) ***NPF Brochure***: Should You Volunteer? PD Research Studies
- 3) ***NPF Mission Statement***
- 4) ***"Parkinson Report"*** (published quarterly)
- 5) ***Parkinson Disease***: What You and Your Family Should Know (English and Spanish)
- 6) ***Parkinson Disease: Nutrition Matters*** (English and Spanish)
- 7) ***Parkinson Disease: Caring and Coping*** (English and Spanish)
- 8) ***Parkinson Disease: Speech and Swallowing***, 2nd Edition
- 9) ***Parkinson Disease: Fitness Counts*** (English and Spanish)
- 10) ***Parkinson Disease: Medications***, 3rd Edition (English and Spanish)
- 11) ***Parkinson Disease: Mind, Mood and Memory***
- 12) ***Activities of Daily Living***: Practical Pointers for Parkinson Disease
- 13) ***Establishing a Legacy***: Creative Giving Management
- 14) ***Medical Alert Card***

This literature is distributed free of charge from NPF's world headquarters in Miami, Florida to all of its Centers and to Parkinson patients around the world.

Chapters and Support Groups

To strengthen the network of support for Parkinson patients, NPF encourages the establishment of affiliate chapters and support groups and provides the guidance and necessary informational materials for their formation and maintenance.

Currently, NPF has a network of 33 affiliate Chapters and plans to continue to expand into every major city. NPF's Chapter Program allows the Foundation to serve the Parkinson community at the local level. Chapters work in partnership with NPF to provide patient and educational services, raise funds for research, and create public awareness of the disease.

Support Group meetings are held on a regular basis in many venues around the nation and the world, for the benefit of patients, their caregivers, and their families. At present NPF lists close to 1,000 Support Groups in the United States and funds Support Group Coordinators.

Conferences and Symposia

Each year, NPF sponsors a Chapter Leadership Conference for Chapter leaders, as well as an NPF Centers Coordinators Conference. These events provide a forum to

develop in-depth interaction in an effort to broaden the communication lines among peers. That communication allows for a more thorough education for the Parkinson disease community.

Biannually, NPF sponsors an International Symposium on Parkinson Research, assembling pre-eminent researchers from around the world to present and discuss the latest investigative developments in the field of Parkinson disease.

Worldwide Website - www.parkinson.org

NPF's site on the worldwide web, www.parkinson.org, is another example of the extended, innovative efforts by the Foundation to give those afflicted and their caregivers a better quality of life and to assist everyone in the Parkinson community, whether a patient, caregiver, friend, medical professional, or researcher. A brief visit to the website will confirm that there is something of interest to everyone involved with Parkinson's.

One of the most successful innovations of the website has been its interactive features. Free services such as "Ask The Doctor," "Ask the Dietitian", and the like, along with the continuous exploration of new technologies, have made the NPF website a warehouse of information and have earned it the distinction of being the most visited website of its kind.

Public Education and Publicity Efforts

NPF believes that one of the most important steps in finding a cure for Parkinson disease is through creating public awareness of the disease. NPF has developed and implemented various campaigns to raise awareness of Parkinson disease and its symptoms, as well as to promote the work done by the Foundation. NPF also helps to fund advocacy

nationally for Parkinson funding by the federal government.

Outreach Services Nationwide

The National Parkinson Foundation has expanded its nationwide services to provide educational and Outreach services at 12 specialized Parkinson Outreach Centers in Albuquerque, Fort Lauderdale, Fort Myers, Henderson, Honolulu, Naples, New Port Beach, Orlando, Springfield (Missouri), Tallahassee, Tampa, and West Palm Beach. Personnel at each of these Parkinson Care Centers are specifically trained by NPF to provide outreach services and counseling to persons with Parkinson disease.

Present at each Outreach Center is a Nurse-Patient Coordinator to educate Parkinson patients, caregivers, family members, and the community; to counsel patients and caregivers on how better to cope with the disease; and to implement special programs and coordinate efforts with Parkinson support groups. Each center features a resource library containing educational brochures, books, videos, and magazines about care and treatment of persons with Parkinson disease. Respite care to assist Parkinson caregivers is available in some areas.

Creation of the Parkinson Care Centers may reduce the need for emergency-room visits due to overmedication, postpone the need for admission to nursing homes, and thereby reduce the economic burden on families and governments alike.

2003-2004 Events and Activities

Allied Team Training for Parkinson

The Allied Team Training for Parkinson (ATTP) is a model interdisciplinary training program offered mainly through a grant from the Department of Health and Human Services, Health Resources and Services Administration (HRSA) Bureau of Health Professions. The goals of the ATTP program is to raise the level of knowledge of current and future allied health professionals; to convey the message that interdisciplinary care is optimal care in approaching the complexity of Parkinson disease and its impact on friends and family; and to address issues of cultural diversity in health-care delivery.

Six training sessions have been conducted in Miami, New York City, Chicago, Springfield (Missouri), Los Angeles, and Houston. Since the beginning of the program, the results from the program evaluations have shown very high trainee satisfaction with the ATTP curriculum for its relevance, practical problem-centered focus, flexible format, and the breadth and depth of its content. The demand for the training has been so great that enrollment already exceeds grant projections by 181 percent!

The projected enrollment to date was 89 for practitioners and 9 for teams. The actual enrollment has been 225 practitioners and 31 teams. During our most recent training session in Houston, Texas, applicants came from as far as Washington State and South Dakota. Our next two training sessions are in Augusta, Georgia, in November, 2004 and in Washington, D.C. in February, 2005.

The Community Partners Program

The Community Partners Program (CPP) is a program sponsored by the National Parkinson Foundation, Inc. and made possible through funding from the Medtronic Foundation. The mission of the Program is to inform whole communities about Parkinson disease, to provide resources and support, to raise awareness, and to improve access to care for every person whose life is affected by Parkinson disease. The CPP seeks to build partnerships and develop local coalitions of community leaders and persons involved in providing applicable services in diverse and underserved regions of the U.S. To date, six such coalitions have been formed. They are located in Miami, Florida; Los Angeles, California; Augusta, Georgia; Chicago, Illinois; Springfield, Missouri; and Lake Charles, Louisiana.

2003-2004 Events and Activities

Partners NEVER Stand Alone!

NPF Chapter Leadership Conference

The NPF Chapter Leadership Conference was held in Miami Beach, Florida from September 11-14, 2003. This event provided a forum to develop in-depth interaction in an effort to broaden the communication lines among peers.

The Universe of the Coordinator

NPF Center Coordinator Conference

The NPF Center Coordinator Conference, titled "The Universe of the Coordinator", was held in Miami, Florida from October 16-18, 2003. The conference provided a unique opportunity for net-

working, learning together through the sharing of best practices, and continuing to identify areas of concern in the development of services for persons whose lives are affected by Parkinson disease.

NPF's 8th International Symposium on Parkinson Research

The National Parkinson Foundation's 8th International Symposium on Parkinson Research was held in New Orleans in November, 2003. The symposium featured 35 invited speakers in eight different sessions, as well as 40 poster presenters.

Attended by approximately 200 scientists, clinicians, and students from North and South America, Europe, and Asia, the meeting continued NPF's support of the most recent and exciting research into the causes, treatment, and potential cure for Parkinson disease.

The program of biannual symposia has been in effect at NPF for over 15 years. The scientific organizers of the symposium, Drs. Ariel Deutch and Franz Hefti, also welcomed the attendees and encouraged them to exchange ideas and benefit from the meeting. The joining of different basic and clinical scientists continued the symposium's tradition of bringing together scientists with very different perspectives and approaches to Parkinson disease in the hope of engendering discussions and novel ideas for future research.

2003-2004 Events and Activities

Nathan Slewett, Linda Hope and Dick Clark

NPF's Gala for Hope 2004

On February 7, 2004, the National Parkinson Foundation hosted its 47th Annual International Gala for Hope at the Eden Roc in Miami Beach, Florida. Nearly 400 people attended the black-tie event. Dick Clark served as Master of Ceremonies for the evening.

The theme was "Hope is Eternal"—a tribute to the late Bob Hope, the longtime chairman of the National Parkinson Foundation Honorary Board of Governors. Linda Hope, the Chief Operating Officer of Hope Enterprises, Inc. and the daughter of Bob and Dolores Hope, was a featured speaker for the evening.

Endless Tappibilities

Katie Kaufman, 12 years old, from Woodland Hills, California witnessed the effects that Parkinson disease has had on her grandfather and wanted to do something about it. Katie tap danced and raised over \$3000 to benefit the National Parkinson Foundation. Katie plans on performing again in 2005 to raise additional funds for NPF.

Boys of Summer

Daniel and Robert Cochrane, determined to raise awareness about Parkinson disease while raising funds for the National Parkinson Foundation, traveled 20,000 miles and visited 30 baseball parks. Robert Cochrane filmed their journey to the baseball parks and spoke with families

who love baseball and who are coping with Parkinson disease. Daniel Cochrane spread the word about Parkinson and raised funds for NPF through his love of the game. The Boys of Summer have completed their journey, and the documentary is now in the production stage.

Robert and Daniel Cochrane

2003-2004 Events and Activities

The 10th Annual Parkinson's Unity Walk

The 10th annual Parkinson's Unity Walk was held on Saturday, April 24th, in New York City's Central Park.

The number of Walk participants has been growing since 1994, when Margot Zobel founded the Walk to raise awareness of Parkinson disease and to raise funds for Parkinson research. Only 200 people walked that year, but they knew they were making history. As pledged, every penny raised was turned over to research.

Since then, the Parkinson's Unity Walk has built upon the success of each previous year, growing the crowd of participants, Parkinson awareness, and funds for research, making it the largest annual event for Parkinson disease. This year's crowd was

estimated at over 7,000 people. And, as pledged since the inception of the Walk, every penny raised will go directly to Parkinson research. This is made possible through the generous corporate sponsors, including its premier sponsors, Boehringer Ingelheim and Pfizer, and other corporate sponsors including Novartis, Bertek Pharmaceuticals, Inc., Medtronic, Inc., and the Weather Channel.

2004 YOPN Conference

*2004 YOPN Organizing
Conference Committee*

The second annual NPF Young-Onset Parkinson Network Conference, "Northern Lights: Blazing Towards a Cure", was held this past summer in Minneapolis, Minnesota. The conference brought together more than 200 participants from around the United States, as well as other places as far away as Australia and England.

Every summer, NPF is proud to present its YOPN annual conference. Conference speakers include clinical experts, professionals

in the areas of caregiving, support, and advocacy, as well as persons living with Parkinson disease.

In addition to the knowledge the attendees gain, the conference provides many opportunities to develop social networks, share life experiences, and support each other. The goal is to provide a welcoming, comfortable environment for young people so often isolated by Parkinson disease.

All gifts and giving societies represent cumulative giving through June 30, 2004. Every effort has been made to include accurate donor listings. Any corrections should be addressed to Mary Ann Sprinkle, Director of Development, National Parkinson Foundation, Inc. at 1-800-327-4545 or msprinkle@parkinson.org.

NPF Financial Report

The following pages were extracted from the audited financial report of the National Parkinson Foundation. The complete accompanying notes are an integral part of those financial statements. If you would like to request a copy of the full audit report, it is available from the office of the Controller, Pamela Olmo.

Certified Public Accountants

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

To the Board of Directors
National Parkinson Foundation, Inc.

We have audited the accompanying consolidated statements of financial position of the National Parkinson Foundation, Inc. (the "Foundation") as of June 30, 2004 and 2003, and the related consolidated statements of activities, cash flows and functional expenses for the years then ended. These consolidated financial statements are the responsibility of the Foundation's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with U.S. generally accepted auditing standards and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Foundation as of June 30, 2004 and 2003 and the changes in its net assets and its cash flows for the years then ended in conformity with U.S. generally accepted accounting principles.

In accordance with Government Auditing Standards, we have also issued our report dated August 27, 2004 on our consideration of the Foundation's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grants. That report is an integral part of an audit performed in accordance with Government Auditing Standards and should be read in conjunction with this report in considering the results of our audits.

Our audits were performed for the purpose of forming an opinion on the basic consolidated financial statements of the Foundation taken as a whole. The accompanying Schedule of Expenditures of State Financial Assistance (page 15) is presented for purposes of additional analysis as required by Chapter 10.650, Rules of the Auditor General, and is not a required part of the basic consolidated financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic consolidated financial statements, and, in our opinion, is fairly stated, in all material respects, in relation to the basic consolidated financial statements taken as a whole.

NOTE 1. GENERAL

Organization

The National Parkinson Foundation, Inc. (the "Foundation") is a not-for-profit organization exempt from income tax under Section 501(c)(3) of the U.S. Internal Revenue Code. The Foundation supports research projects and provides public education programs to benefit Parkinson and related neurologically diseased patients and their caregivers.

Basis of Consolidation

The accompanying consolidated financial statements include the accounts of the Foundation and its financially related not-for-profit organizations: National Parkinson Foundation Care Center of Florida ("NPFCC") and National Parkinson Foundation Rehabilitation, Inc., ("NPF Rehabs") a discontinued operation. Although these entities are separately incorporated, they are related through common members of the Board of Directors of the Foundation.

The NPF Rehabs formerly operated 30 rehabilitation facilities in eight states. On December 31, 1998, the NPF Rehabs ceased all operations of the rehabilitation facilities. In previous fiscal years, the NPF Rehabs' rehabilitation facilities activity was reported as a discontinued operation. As of June 30, 2004, all intercompany accounts and transactions have been collapsed into the statements of the parent organization, National Parkinson Foundation, Inc. All reserves have been depleted and any future collections of receivables or reimbursement of Medicare overpayments will be absorbed by the Foundation.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Financial Statement Presentation

Net assets and revenues, gains and losses are classified into three classes of net assets based on the existence or absence of donor-imposed restrictions. The three classes of net asset categories are as follows:

Unrestricted - Net assets which are free of donor-imposed restrictions; all revenues, gains, and losses that are not changes in permanently or temporarily restricted net assets.

Temporarily Restricted - Net assets where the use by the Foundation is limited by donor-imposed stipulations that either expire by passage of time or that can be fulfilled or removed by actions of the Foundation pursuant to those stipulations.

Permanently Restricted - Net assets where the use by the Foundation is limited by donor-imposed stipulations that neither expire with the passage of time nor can be fulfilled or otherwise removed by actions of the Foundation.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)*Use of Estimates*

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures including, but not limited to, the determination of the net realizable value of receivables and the useful lives of donated and acquired assets. Accordingly, actual results could differ from those estimates.

Cash and Cash Equivalents

The Foundation considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents.

Investments

The Foundation reports their investments under Statement of Financial Accounting Standards (SFAS) No. 124, "Accounting for Certain Investments Held by Not-for-Profit Organizations". Under SFAS No. 124, a not-for-profit organization is required to report investments in equity securities with readily determinable fair values and all investments in debt securities at fair value, with unrealized gains and losses included in the consolidated statements of activities in net appreciation (depreciation) on investments. The fair value of marketable securities is determined by quoted market prices.

Public Support

All contributions are considered to be available for unrestricted use, unless specifically restricted by the donor.

Concentrations of Credit Risk

Financial instruments that potentially subject the Foundation to concentration of credit risk consist primarily of cash deposits and investment securities. The Foundation's investment securities consist mainly of investment grade securities and cash deposits with major financial institutions and brokerage firms. By policy, the Foundation limits the amount of credit to exposure to any one financial institution. Although cash balances may exceed federally insured limits at times during the year, the Foundation has not experienced any losses in such accounts.

Property and Equipment, Net

Property and equipment is stated at historical cost less accumulated depreciation, except that donated property and equipment used in the normal course of business is stated at the approximate market value at the date of donation. Depreciation is computed using the straight-line method over the estimated useful lives, varying from 3 to 40 years, of the respective assets. Repairs and maintenance costs are expensed as incurred. When items are retired or otherwise disposed of, the related costs and accumulated depreciation are removed from the accounts and any resulting gains or losses are credited or charged to operations. It is the Foundation's policy to capitalize all fixed assets greater than \$500.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Contributions

Contributions received or made, including unconditional promises to give, are recognized as revenues or expenses in the period received or made at their estimated fair value. Contributions are considered to be available for the general programs of the Foundation unless specifically restricted by the donor. The Foundation records gifts of cash and other assets as restricted support if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the consolidated statements of activities as net assets released from restrictions.

The University of Miami donates certain space for use by the Foundation. Revenues and expenses of \$274,740 and \$242,000, respectively, are reflected in the consolidated financial statements for the year ended June 30, 2004 and 2003 at the estimated value of landlord services of these donated facilities.

Split-Interest Agreement

Charitable gift annuities are recorded at fair value at the date received. The Foundation records a liability for the present value of the annuities payable, based upon life expectancy tables. A contribution is recorded for the difference between the fair value of the gift and the liability recorded. Investment income and gains are credited, and annuity payments and investment losses are charged, to the liability account. Periodically, an adjustment is made to the liability to record the gain or loss due to recomputation of the liability based upon the revised life expectancy. Upon the death of the donor annuitant, the Foundation recognizes the existing liability as a change in the value of the annuity and the related asset is available for use by the Foundation.

Charitable lead trusts and charitable remainder trusts in which the Foundation is not the trustee are recorded in the temporarily restricted assets class as a receivable at the present value of the expected future cash inflows and contribution revenue is recognized for the same amount. In the event that the trust has an income beneficiary other than the Foundation, the contribution revenue is reduced by the amount of the present value of the estimated liability due to the income beneficiary.

Net Assets Released from Restrictions

Amounts include \$2,711,000 and \$8,094,643, respectively, of expiration of time and purpose restrictions for the years ended June 30, 2004 and 2003.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)***Grants Payable***

The Foundation has made conditional multi-year promises to give to several institutions for various purposes. Conditional promises to give are not recorded as expense until the conditions are substantially met. At each annual anniversary date of the agreement with these institutions, the Foundation determines whether the institution has substantially met the conditions and then grants the next annual funding commitment to the institution.

Income Taxes

The Foundation qualifies as a tax-exempt organization under Section 501(a) as an organization described in Section 501(c)(3) of the Internal Revenue Code of 1986, as amended. Accordingly, no provision for federal or state income tax is required for revenues derived from its tax-exempt function.

Impairment of Long-Lived Assets

The carrying value of long-lived assets is reviewed if the facts and circumstances, such as significant declines in revenues, earnings or cash flows or material adverse changes in the business climate, indicate that they may be impaired. The Foundation performs its review by comparing the carrying amounts of long-lived assets to the estimated undiscounted cash flows relating to such assets. If any impairment in the value of the long-lived assets is indicated, the carrying value of the long-lived assets is adjusted to reflect such impairment based on the fair value of the impaired assets or an estimate of fair value based on discounted cash flows.

Reclassifications

Certain amounts in the 2003 financial statements have been reclassified to conform to the 2004 presentation.

NOTE 5. AGREEMENT WITH THE UNIVERSITY OF MIAMI

The Foundation and the University of Miami (the "University") were in the 22nd year of a 25-year Affiliation Agreement for the purpose of conducting patient care, research and education for patients with Parkinson's disease and other neurological disorders (the Agreement). During October 2002, the Foundation entered into a new affiliation agreement with the University. At approximately the same time, the Foundation entered into an Agreement for Sale and Purchase, Lease Agreement, and Grant Agreement. The Foundation agreed to transfer ownership interest of its corporate headquarters to the University for \$6,000,000. This amount was recorded as a gain on asset disposal net of related costs on the consolidated statement of activities for the year ended June 30, 2003. The University agreed not to impose a charge for rent as long as the Foundation continues to provide funding in accordance with the Grant Agreement.

Under the terms of the new Grant Agreement, the Foundation's funding commitment to the University increased to \$1,800,000 a year, for a period of at least five years. Under the new agreement, the Foundation and the University jointly operate the Foundation owned existing facilities and the University is responsible for the expenses of maintaining the facilities.

NOTE 7. RELATED PARTIES

Certain members of the Board of Directors, ("Board") support the Foundation financially or provide services to the Foundation. Below is a summary of significant transactions with members of the Board as of and for the years ended June 30:

	<u>2004</u>	<u>2003</u>
Net pledges receivable	\$ 150,094	\$ 139,785
Contributions	117,778	150,158

Additionally, in 2004 and 2003 a Board member and his employer, where he serves as senior vice president, served as the custodial investment manager for certain investments totaling \$26,784,086 and \$19,329,455, respectively. His firm was paid fees of \$5,311 and \$16,648, in 2004 and 2003, respectively. Other services provided by Board members include in-kind legal services. Due to the nature of these services, it is not practical to estimate the value of these services.

NOTE 8. CONDITIONAL GRANTS

As part of its ongoing research programs, the Foundation has entered into a multi-year agreement with the University of Miami (see NOTE 5) for the purpose of conducting research. As of June 30, 2004, the Foundation has conditional commitments to fund the University of Miami, as follows:

Institution	<u>Agreement Expiration Date</u>	<u>Conditional Commitment</u>
University of Miami School of Medicine	September 30, 2007	\$ 5,400,000

The Foundation is committed to fund the University of Miami in an ongoing manner, based on its compliance with certain conditions set by the Foundation and detailed in the Operational Budget attached to the grant agreement.

Individual Research Grants

Steven C. Pruitt, Ph.D.
Health Research, Inc.
Buffalo, NY

Eric Huang, M.D., Ph.D.
University of California at San Francisco
San Francisco, CA

Chad M. Rienstra, Ph.D.
University of Illinois at Urbana-Champaign
Urbana, IL

Vincenzo Bonifati, M.D., Ph.D.
Erasmus Medical Centre
Rotterdam, The Netherlands

Nan-Kuei Chen, Ph.D.
Brigham and Women's Hospital
Harvard Medical School
Boston, MA

Yvonne Schmitz, Ph.D.
Columbia University
New York, NY

Maria Pavlaki, Ph.D.
Foundation of Biomedical Research of the Academy of Athens
Athens, Greece

Guglielmo Foffani, Dott. Ing.
Drexel University
Philadelphia, PA

Chun Zhou, M.D., Ph.D.
N.Y. State Dept. of Health/ Health Research
New York, NY

Jau-Shin Lou, M.D., Ph.D.
Oregon Health and Science University
Portland, OR

Maolin Guo, Ph.D.
University of Massachusetts
Dartmouth, MA

Jason Eriksen, Ph.D.
Mayo Clinic Jacksonville
Jacksonville, FL

Horst H. Simon, Ph.D.
University of Heidelberg
Heidelberg, Germany

John C. van Swieten, M.D., Ph.D.
Erasmus Medical Centre
Rotterdam, The Netherlands

Srinivas Bharath Muchukunte Mukunda, Ph.D.
Buck Institute for Age Research
Novato, CA

Penelope J. Hallett, Ph.D.
Massachusetts General Hospital
Charlestown, MA

The National Parkinson Foundation believes that in our battle with Parkinson disease, knowledge is power and hope is everything. Every day at NPF we strive to provide patients and caregivers with the resources that help you fight back. We will support the research that moves us all forward. The cause and cure of Parkinson disease will be found. **Please help us!**
