

## **Movement Disorders Nurse Practitioner Fellowship (Job) Description**

In the Movement Disorders Clinic within the Brain Health Center at Emory Healthcare, we strive to diagnose, treat, and manage each person with a movement disease or disorder with the most current, cutting edge, and evidenced based approach, so they may get the most out of life. Our multi-disciplinary team includes neurologists, advanced practice providers (APP), nurses, social workers, and many other team members, each with a vital role in helping the people for whom we care. Our approach is team oriented, built around communication and coordination of care, with respect for each team member's expertise and contribution to the life of our patients.

We have an opportunity to offer two **Movement Disorder Fellowships to Nurse Practitioners** to provide outpatient care in a clinic setting at the Brain Health Center in Atlanta, Georgia.

### **Specific Aims of the Fellowship:**

To train, mentor, and promote expert clinician specialists who will devote their careers to the care of persons with Parkinson's disease and related movement disorders.

### **Program Overview**

Nurse Practitioner Fellows train alongside Physician Fellows. This interprofessional approach prepares graduates to participate in and facilitate collaborative interdisciplinary care. The Nurse Practitioner Fellowship program consists of a minimum of 300 didactic or classroom hours and 1,500 mentored clinical hours. Nurse Practitioner Fellows can generally expect to spend 5 days a week for eight to ten hours a day on-site. Most likely four days will be clinical with one day of administrative work to understand this aspect of Parkinson's care. This may vary based on activities. Clinical experiences occur in inpatient and ambulatory settings.

### **Some highlights of this Fellowship opportunity include:**

- The Movement Disorders Clinic provides the highest level of care for individuals with a movement disorder, including, Parkinson's Disease, Lewy Body Disease, Progressive Supranuclear Palsy, Tremors, Huntington's Chorea, Multiple System Atrophy, Corticobasal Degeneration, Drug-induced Parkinsonism, Tardive Dyskinesia, Ataxia, and Tics
- You will be joining a strong and friendly team of physicians, advanced practice providers, social workers, and a variety of additional specialized team members.
- A positive, inclusive, and democratic culture
- Support for your development and well-being through the respected Emory HealthCare's Office of Advanced Practice - an internal organization committed to the growth and development of our Advanced Practice Providers.

### **Role Responsibilities and Accountabilities:**

The NP Fellow, over the course of the training, must be able to demonstrate the knowledge and skills necessary to provide care appropriate to patients with movement /disorders.
