

Parkinson's Foundation Research Collaborative

Industry partners play an important role in advancing Parkinson's Foundation research by supporting collaborative efforts that advance therapeutic development and engagement in Parkinson's research. Your support of the Research Collaborative will help sustain the infrastructure required for meaningful engagement, education and research readiness. Member support is directed toward programs, engagement activities and operational efforts that benefit the broader research ecosystem.

Our partners gain:

- Insights into community priorities and unmet needs
- Bidirectional learning between researchers and community
- Opportunities to incorporate patient and care partner perspective in the design and implementation of their research
- Increased visibility within the broader PD research community
- Opportunities for collaboration across sectors
- Better alignment between research design and real-world experiences

All members of the Research Collaborative receive the following:

Open Access (At No Cost)	Additional Opportunities Available (Funding Requested)
Access to summary data from Foundation cohorts (eg, PDGENERation, Parkinson's Outcomes Project, etc.)	Study included on Parkinson.org under "Join a Study" page
High level data map, e.g., distribution of LRRK2 carriers	Webinars and podcasts
PD Trial Navigator data	Presence at Parkinson's Foundation Clinical Conference and Moving Day events
Virtual calls with members of the Parkinson's Foundation clinical research team	Data analysis requiring the services of a data specialist
Opportunity to join a National Research Advocate call to present research and get group feedback from Research Advocates	Patient engagement, feedback and in-depth interaction with Research Advocates (eg., survey, advisory boards, focus groups)
